Summary

Backend software engineer with 3 years of experience building Java and Spring Boot microserv
ices for payments and e-commerce domains. Worked on REST APIs, Kafka-based event pipelines a
nd PostgreSQL performance tuning.

Skills

Java 17, Spring Boot, Spring Security, Spring Data JPA, REST, microservices, PostgreSQL, MyS
QL, Kafka, RabbitMQ, Redis, Docker, Git, JUnit, Mockito, Jenkins CI, AWS (ECS, S3)

Experience

Software Engineer II ? Payverse Technologies (2023 ? Present)

- Built a refund processing service in Spring Boot handling 40k refunds/day, cutting settlem
ent latency by 35%.
- Designed idempotent payment webhook consumers on Kafka with retry and dead-letter handling
.
- Migrated 12 REST endpoints to a versioned API contract and added Mockito integration tests
 raising coverage from 54% to 82%.

Software Engineer ? Shopkart Solutions (2021 ? 2023)

- Developed order and inventory microservices in Java/Spring Boot behind an API gateway.
- Optimised slow PostgreSQL queries (missing indexes, N+1 ORM fetches) and reduced p95 API l
atency from 900 ms to 320 ms.
- Containerised services with Docker and maintained the Jenkins pipeline.

Projects

RideShare Analytics ? Spring Boot + Kafka + Redis service that aggregates ride events in nea
r real time; deployed on AWS ECS.
FileVault ? Spring Security based document vault with JWT refresh tokens and per-object acce
ss policies.

Education

B.E. Computer Science, RV College of Engineering, 2021 ? CGPA 8.4/10

Certifications

AWS Certified Cloud Practitioner (2023) • Oracle Certified Professional: Java SE 11 Develope
r (2022)
